

EDUCATION

- 10/2023 - Now PhD in Statistics and Machine Learning** *Soda Team, Inria de Saclay, France*
Supervised by Gaël Varoquaux et Judith Abécassis (Inria)
Working on survival analysis in collaboration with APHP (group of hospitals in Paris)
- 2022 - 2023 Master MVA (Mathématiques, Vision, Apprentissage)** *ENS Saclay, France*
 - Computational Statistics, Introduction to statistical learning,
 - Geometrical Data Analysis, Reinforcement Learning,
 - Object recognition and computer vision, Medical Image Analysis
- 2019 - 2023 Engineering BSc and MSc in Applied Mathematics** *Ecole Des Ponts Et Chaussées, France*
Top-tier French engineering school

INDUSTRY EXPERIENCE

- 2023 Research internship** *Soda Team, Inria de Saclay, France*
4 months internship where I was working on the Paris hospital database to predict the death after a foot ulcer. on diabetic patients.
- 2023 Machine Learning engineer** *Scopeo, Paris, France*
6 months internship where I developed an ML pipeline to read invoices.
- 2022 Machine Learning engineer** *BNP Paribas, London, United Kingdom*
6 months internship working with the electronic commodities trading team.

TEACHING

- 2024, 2026 Censored Data and Survival Analysis** *Dauphine, Paris*
7h course in a MBA master to teach censored data and survival analysis.
- 2024, 2025 Assisting Professor** *Ecole Polytechnique, Saclay*
24.5h teaching in the Introduction to Python for Data Science course given by Mathurin Massias.

RESEARCH PAPERS

Here is a list of the selected papers that I contributed to. See Google Scholar to have the whole list.

- 2026 On the calibration of survival models with competing risks**
[Julie Alberge](#), Tristan Haugomat, Gaël Varoquaux, Judith Abécassis
Spotlight, Published in AISTATS
- 2025 Survival Models: Proper scoring rule and stochastic optimization with competing risks**
[Julie Alberge](#), Vincent Maladière, Olivier Grisel, Judith Abécassis, Gaël Varoquaux
Published in AISTATS
- 2025 From Prediction to Prescription: Machine Learning and Causal Inference for the Heterogeneous Treatment Effect**
Judith Abécassis, Elise Dumas, [Julie Alberge](#), Gaël Varoquaux,
Published in Annual Review of Biomedical Data Science 8

SELECTED TALKS

I have given several talks. Here is a list of some of them.

2026	AISTATS	Tangier, Morocco
2025	Women In Machine Learning And Datascience	Paris, France
2025	Journées des Statistiques	Marseille, France
2025	Seminar OKCHAM Team	Lyon, France
2025	GIS Days at EDF lab	Saclay, France
2025	Siminar PREMEDICAL Team	Montpellier, France
2024	APHP's month meeting on DataScience	Paris, France
2024	Journées des Bio-statistiques	Paris, France
2024	Seminar Team	EPFL, Switzerland

ORGANIZATION OF SCIENTIFIC EVENTS

2025 NeuripsInParis

- NeuripsInParis is a 2-day event gathering 200+ people in Paris. This event provides a local alternative to the [NeurIPS conference](#). It aims to address some sustainability and inclusivity concerns in machine learning research. This event is organized by a team of 6 people.
- Team research: We selected 2 senior researchers to give keynote talks in the morning, select which papers were accepted to give an oral presentation, and create a scientific program for the two days.
- This year, more than 400 people wanted to come to the conference.

2024 MECOSA: Methodological and Computational Advances On Survival Analysis

- With Judith Abécassis, Linus Bleinstein, Julie Josse, and Agathe Guilloux, we organized a workshop around the recent advances in survival analysis that gathered around 50 people at Inria Paris.

2023-2024 Organization of the team's weekly seminars

- With Jun Kim, we invited one researcher to talk for 1h in front of the whole team.

REVIEWING

- Biometrika, 2025
- Neurips
- ICRL

OPEN-SOURCE COMMUNITY

hazardous

- Core developer of hazardous, a scikit-learn compatible Python library to do survival analysis and competing risks.
- We released the library in 2024, where we have put SurvivalBoost, a model that we developed, as well as useful metrics in survival analysis and competing risks.

SKADA, BenchOpt

- Took part in sprints for those two Python libraries, exciting times!

OTHERS

Develop'Ponts

- **Member of the humanitarian team:** responsible for communication for the design and financing of 13 handwashing stations in Nepal, thanks to local partners and corporate prospecting.
- **Equality team member:** organised conferences to prevent harassment and workshops on gender equality. Defended students who were victims of all forms of harassment by setting up a helpline.
